

Fall 2016

**Immunization Update**

**From the Ohio Department of Health**

**New Immunization Requirement for 7<sup>th</sup> and 12<sup>th</sup> grade students**

**MCV4 Meningococcal Immunization**

This vaccine protects students against the Meningitis Disease.

Please provide your child's school clinic with verification of immunization information prior to the start of the 2016-2017 year to avoid any unnecessary delays in your student attending school. Students who do not have the immunizations as required by the ODH state law **will not** be permitted to attend school after 14 days.

Parents of 7<sup>th</sup> graders, please be advised that this vaccine **is in addition** to the Tdap booster. Your student will need proof of both (meningococcal vaccine and the Tdap booster before entering 7<sup>th</sup> grade.

Sincerely,

Raylaine Butler RN
