

## SALES REPRESENTATIVES

The Board recognizes the value of staff members being informed of the latest commercial materials available to assist in their teaching and welcomes competent representatives of such publishers and manufacturers. However, the Board does not want classroom teachers distracted or undue administrative time taken from previously assigned duties.

The superintendent shall develop regulations that will protect the staff from outside pressures yet will take advantage of the knowledge brought into the schools by sales representatives.

Adopted by Board: May 29, 1980
