

RELATIONS WITH THE PUBLIC

The Board believes that a full understanding by the public of school issues, the school program, and its opportunities for the students is one of the most effective means of developing public support for a superior school system. The Board and the staff shall use appropriate means as determined by the Board to inform the community of the objectives, achievements, and needs of the school district.

The Board desires to involve citizens of the community in the affairs of the schools and to develop an understanding for the schools. The superintendent shall identify channels through which local citizens may make their desires and criticisms known to the Board.

Persons requesting information regarding the schools or visiting the schools shall be treated in a courteous manner and may expect a prompt and informative reply to legitimate questions on matters not protected from disclosure by Ohio or Federal Law.

Adopted by Board: April 23, 1987

Amended by Board: August 10, 1989
